

MEDGENERACIJSKI CENTER DOMŽALE Multi-generation Centre Domžale

Val življenja

Medgeneracijski center se nahaja v kraju Domžale. Najlepša lastnost postavitve tega centra je čudovit pogled na Kamniško Bistrico ter Kamniško savinjske Alpe. Poleg prvotnega bivalnega namena za starejše občane sam center nudi možnost druženja, povezovanja in ustvarjanja med generacijami. Rdeča nit centra je Kamniška Bistrica (voda), ki se elegantno vije v neposredni bližini. Element vode je vključen v notranjo in zunanjo ureditev, saj blagodejno vpliva na počutje starejših ljudi in hkrati malce umiri živahnost mlajših generacij v centru.

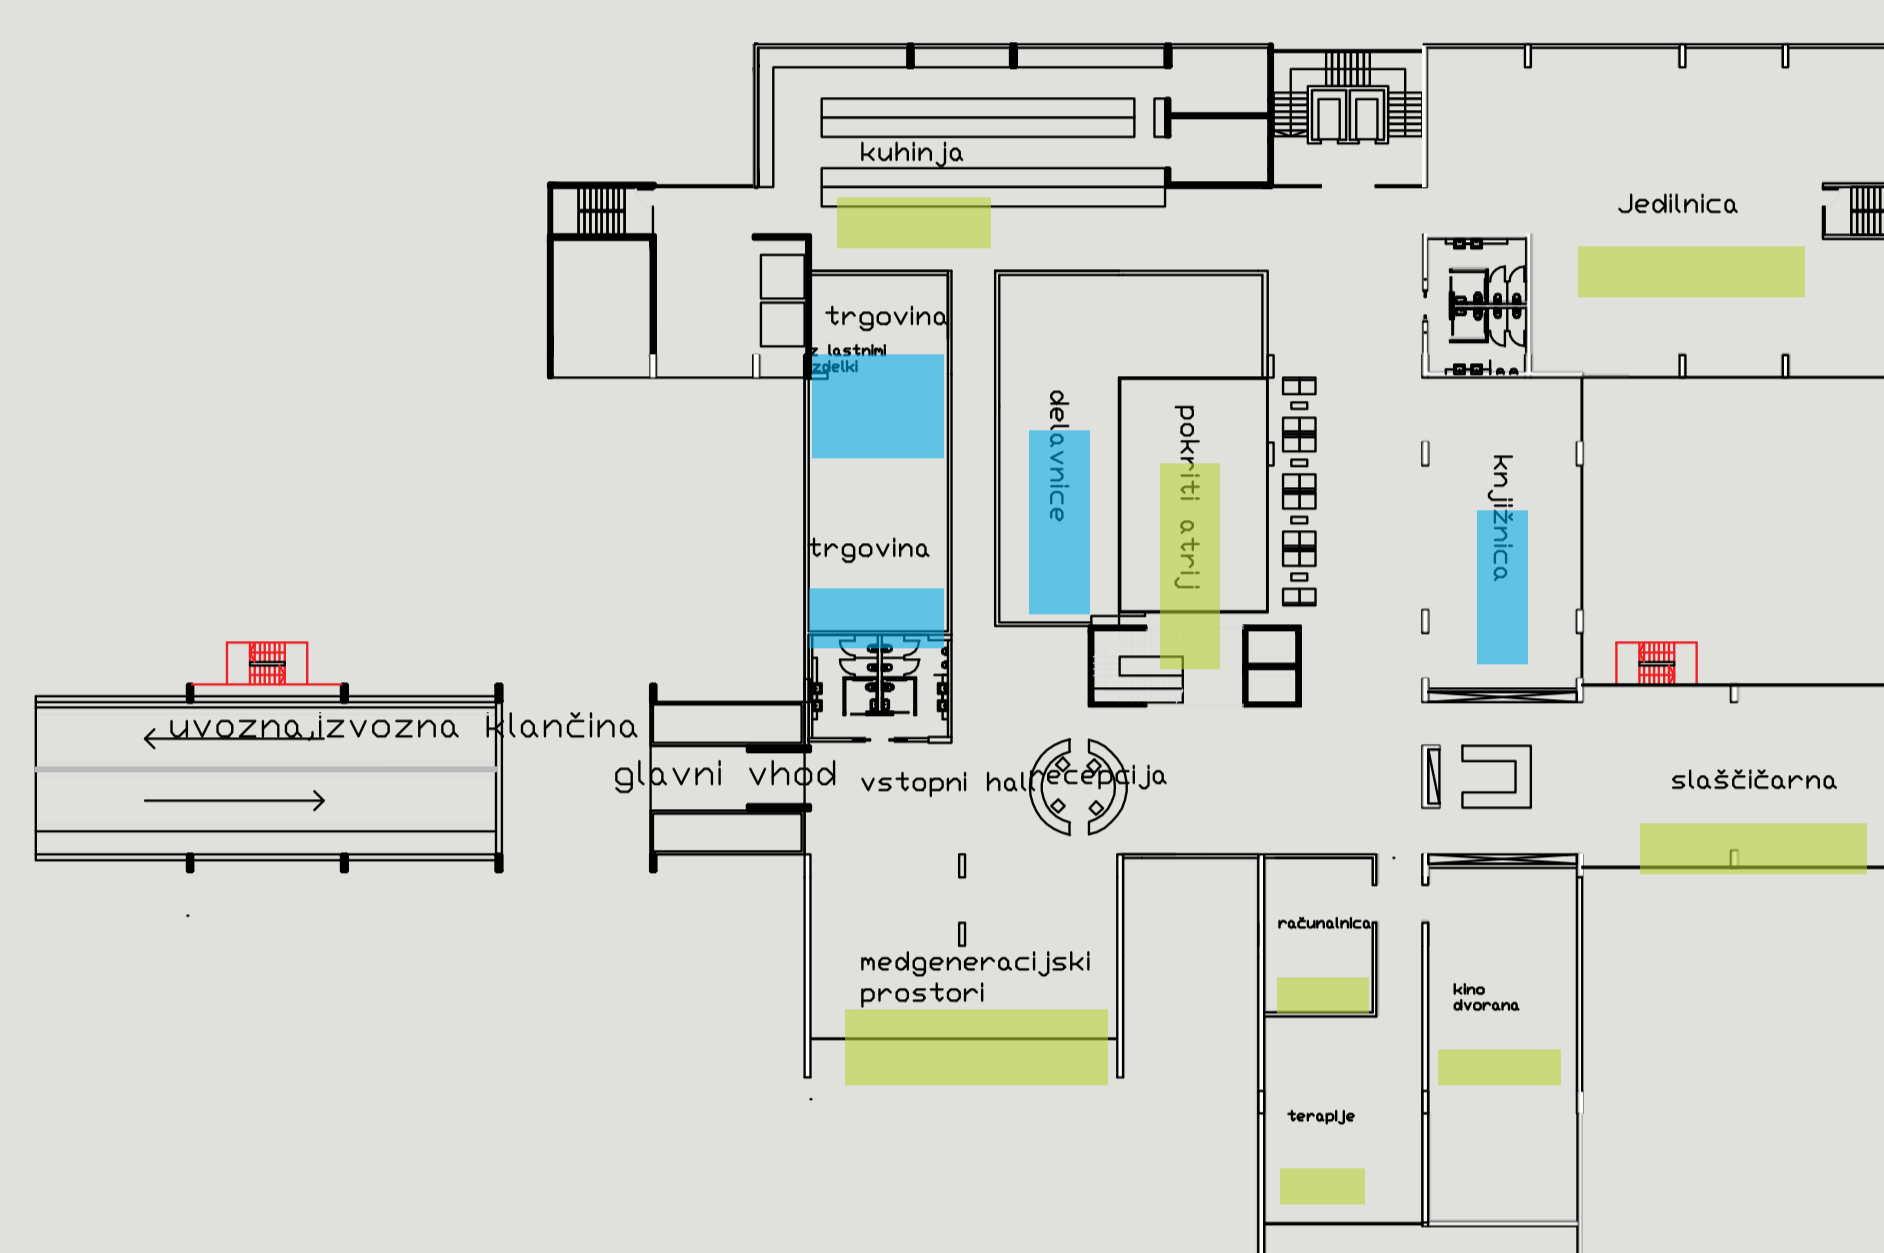

Intergeneration center is situated in town of Domžale. The most beautiful feature of its position is a wonderful view of Kamniška Bistrica and Kamnik savinja Alps. In addition to being a residing center for senior citizens it serves as a meeting point and offers possibility of connecting all generations and stimulating intergenerational creativity. Common thread of the center is Kamniška Bistrica (water), which gracefully flows in the very proximity of the center. The element of water is included in interior and external disposition of the center – it has a positive influence on well being of elderly people, but at the same time it calms down the vivacity of younger generations.

Opis pritličja

Medgeneracijski center, mini kino dvorana (predavalnica), slaščičarna z časopisnim kotičkom, prostori za delavnice, trgovina z izdelki, trgovina z osnovnimi potrebščinami, pokrit atrij v samem središču tlorisa, ločen prostor za terapije z živalmi, računalniška učilnica, knjižnica, kuhinja in jedilnica.

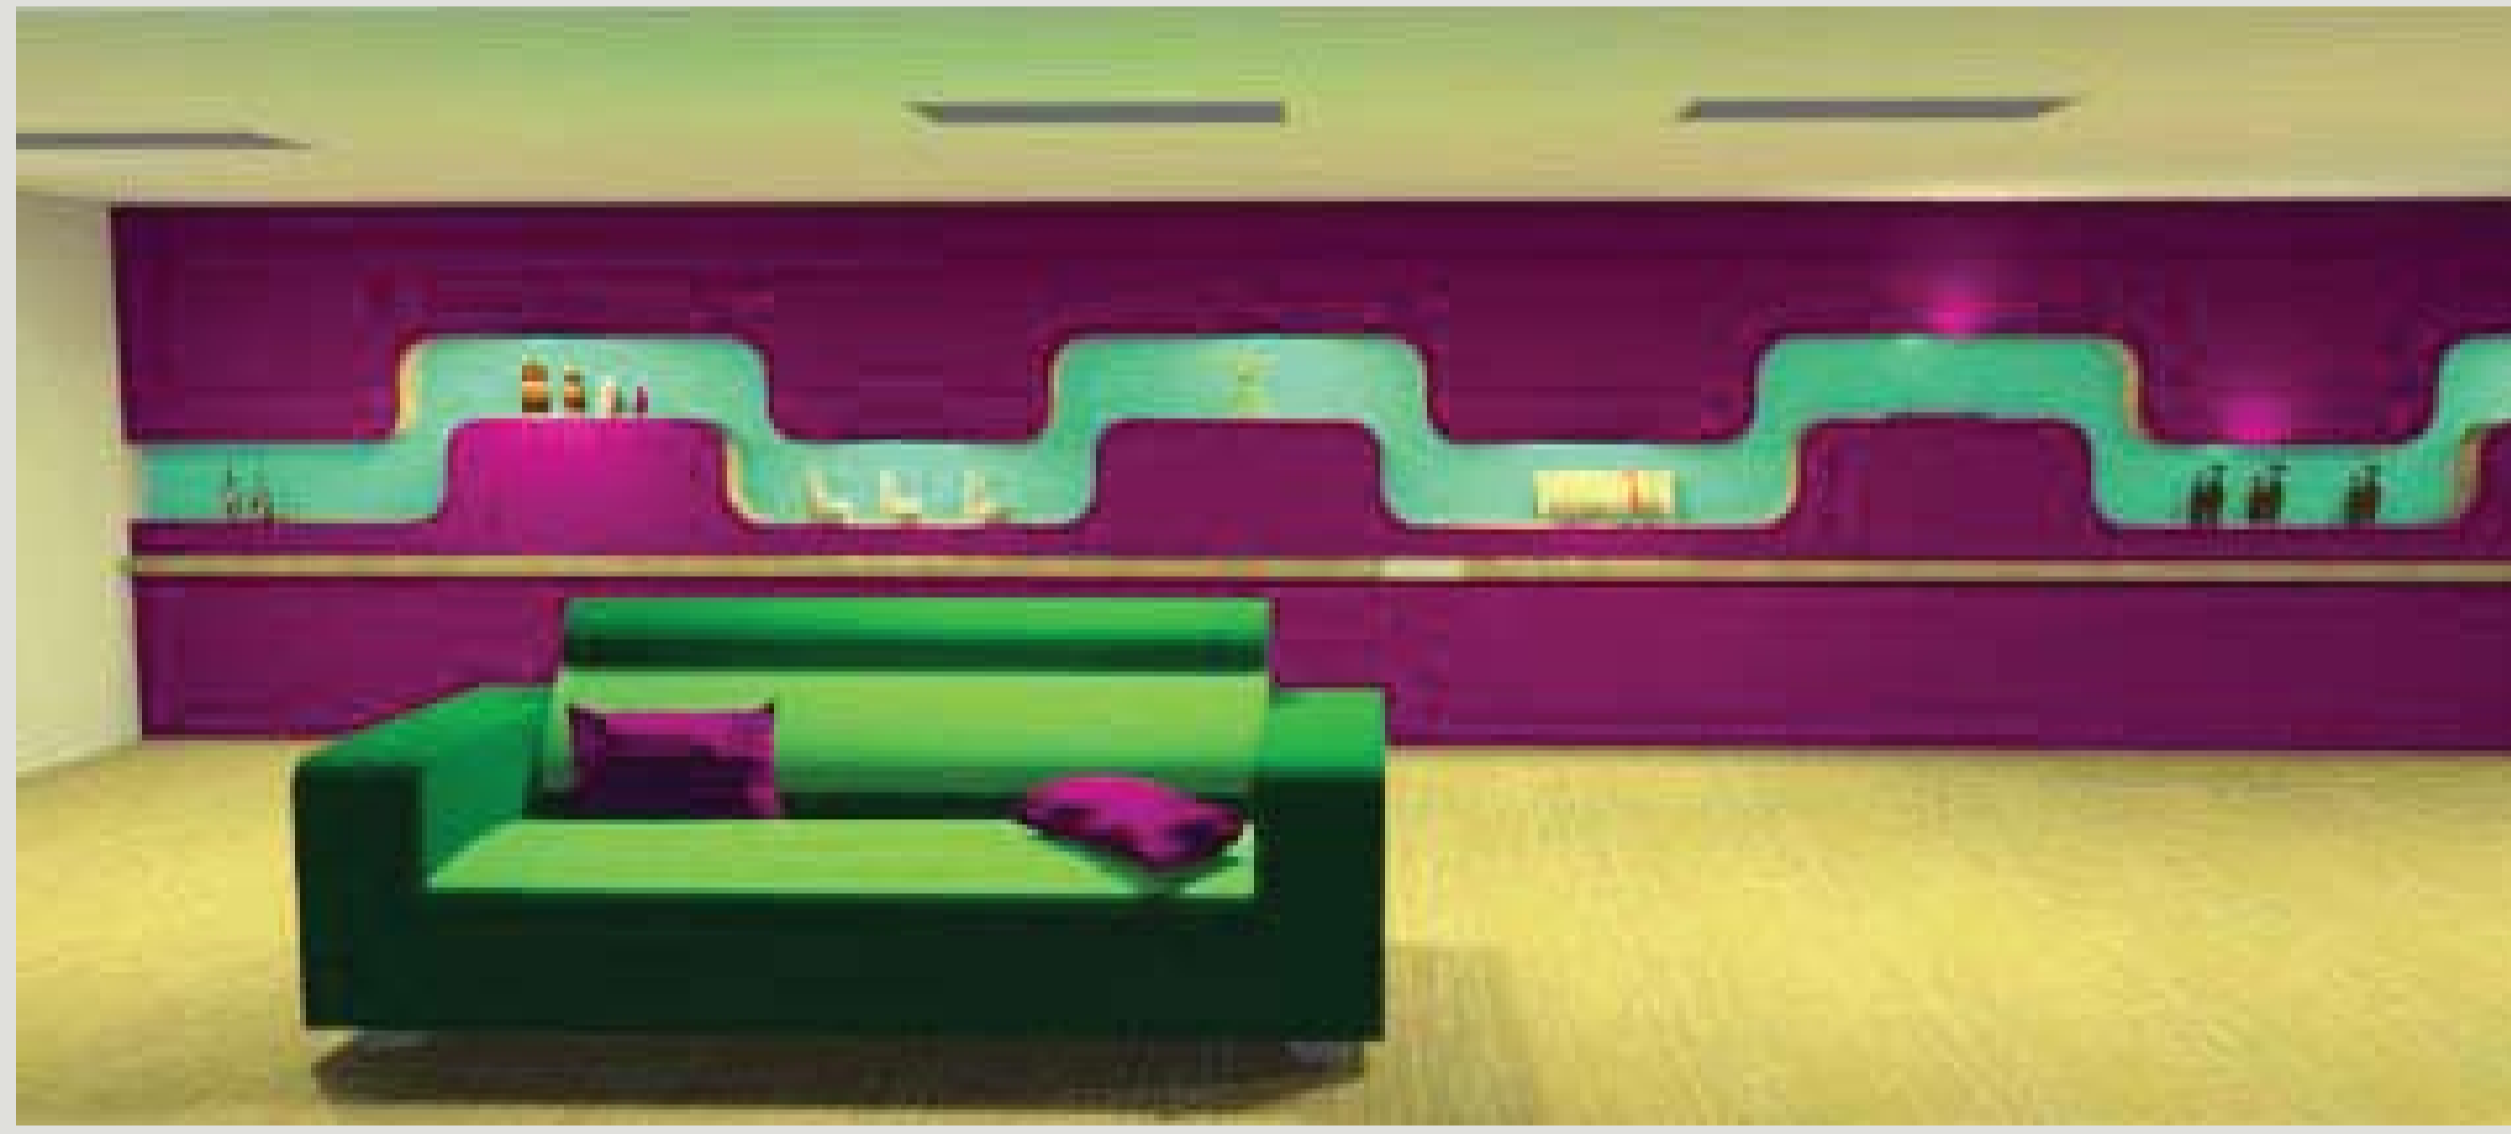

Description of ground floor

Intergeneration center, miniature cinema (lecture room), sweetshop with newspaper corner, workshop rooms, shop for selling the products, shop with basic necessities, roofed atrium in the middle of ground plan, separate room for animal assisted therapies, computer classroom, library, kitchen and dining room.

Hodnik (pritličje)

Hodnike v pritličju in nadstropju krasi in steno vgrajena (osvetljena) vitrina v obliki stiliziranih valov, ki smo ga poimenovali Val življenja. Tja je bila umeščena z namenom, dasevneje razstavljajo osebni predmeti prebivalcev ter izdelki raznih delavnic, ki potekajo v sklopu medgeneracijskega centra. Prav tako ima nalogo voditi radovedneže v samo osrčje objekta.

Ground floor hallway

Ground floor hallway is adorned with in-wall (highlighted) glass case in the shape of stylized waves we named Wave of life. Its purpose is to serve as a show space for personal effects of residents and products of various workshops, held by the intergeneration center. Its secondary purpose is to lead the curious into the very heart of the building.

Hodniki

Hodniki v bivalnih nadstropjih so prav tako opremljeni v elementu vode. Tla so ublažena z modrimi preprogami, ki smo jih potegnile po steni navzgor in s tem ustvarile občutek mirne rečne struge, ki nas vodi po hodniku. Zgornji deli stene so okrašeni s tapetami in slikami 3D prizorov z narave.

Hallways

Hallways in residential areas are adorned with element of water as well. Floor is softened with blue carpeting, pulled up the wall for creating a sensation of calm riverbed, which leads the way through the hallway. Upper parts of walls are adorned with wallpaper and 3D images of natural scenes.

Sobe

Sobe so opremljene v sodobnem duhu z intenzivnimi, a hkrati pomirjujočimi barvami. Kombinacija vijolične in zelene barve se skladno razvija čez celotno notranjo ureditev same sobe. Notranja oprema je povsem prilagodljiva ter premična in se lahko prilagaja vsakemu posamezniku, njegovim individualnim potrebam ter željam.

Rooms

Rooms are furnished in modern spirit with lively yet calming colors. Combination of violet and green harmonically flow throughout the whole room. Furniture is very adaptable and movable, so it can be individually adjusted to anyone's needs and wishes.

Terasa

Strešna terasa je namenjena tako počitku kot rekreaciji stanovalcev centra in zunanjih gostov. Omogoča nemoten pogled na Kamniško-Savinjske Alpe in prelepo Kamniško Bistrico, ki se mirno vije ob vznožju medgeneracijskega centra. Terasa ima tudi štiri večje ter eno manjšo dvorano, v katerih se odvijajo različne terapije, na primer plesne delavnice, joga itn. Ker so stene v dvoranah premične, se lahko celoten prostor odpre in s tem ponudi možnost prirejanja raznih večjih prireditev, kot so koncerti, plesi, praznovanja...

Terrace

Roof terrace is designed for leisure and recreation of center's residents as well as outside guests. It provides undisturbed view of Kamnik Savinja Alps and beautiful Kamniška Bistrica, which peacefully winds past intergeneration center. The terrace has four larger halls and one smaller hall for various therapies, dance workshop, yoga etc. Walls are mobile, so the whole room can open up and provide enough space for events on a larger scale, concerts, dances, celebrations,...

Vrt

Vrt je opremljen po istem načelu kot strešna terasa, le da ima vrt direkten pogled na reko, ki teče mimo. Dodali smo otroško igrišče ter kegljišče, ki ponuja različnim generacijam v medsebojno druženje ter skupno preživljanje prostega časa.

Garden

The garden is equipped with the same principle as a roof terrace, garden only to have a direct view of the river, which flows past. We added a children's playground and bowling alley that offers different generations to each other and being together joint leisure time.
